

Amendments to the Specification:

Please replace the paragraph beginning on page 7, line 15, with the following rewritten paragraph:

The above internal device 3 is implanted in advance in the patient's body in a surgical operation. For instance, the secondary coil 21 and the receiving device 22 including signal wires 24 are implanted in a portion of the patient's head between the skin and the head bone as shown in Fig. 1. Especially, the secondary coil 21 is implanted in a portion ~~hided with his~~ hidden by his hairs so as to be inconspicuous when the primary coil is attached. The receiving device 22 is implanted near the eye to shorten the distance from the electrodes 23. These secondary coil 21, receiving device 22, and signal wires 24 are covered with an insulating material with high biocompatibility, such as polyimide.
